NEWS RELEASE

Water District To Conduct Rain Barrel Building Demos May 9th at Fayetteville Farmers Market

Beaver Water District will conduct two rain barrel building demonstrations at 8:30 a.m. and 10 a.m. on Saturday, May 9th, at the Fayetteville Farmer's Market on the downtown square in Fayetteville. Those participating will learn how to build a rain barrel and leave with step-by-step instructions. Additionally, barrels built that morning will be given away in a drawing to those who attend.

Rain barrels are a water conservation tool. Positioned under a gutter of a home, a rain barrel will capture runoff during rain events. Water may then be used to water the lawn and flowers.

Beaver Water District supplies drinking water to more than 250,000 people and industries in Fayetteville, Springdale, Rogers, Bentonville and surrounding areas. The District's mission is to serve our customers in the Benton and Washington County area by providing high quality drinking water that meets or exceeds all federal and state regulatory requirements in such quantities as meets their demands and is economically priced consistent with our quality standards.
